

KCC 2018 Waste Audit Report																			
Data Sheet																			
Building: OSC		Bucket tare:		7.8															
		Bag vol. (gal.):		55 gallon															
WASTE CATEGORIES		BAG 1		BAG 2															
		WEIGHT (LBS)	VOLUME	WEIGHT (LBS)	VOLUME														
Items of Interest																			
Plastic to-go cups		1.1																	
Wax paper cups (coffee cups)		1.1																	
Compostable take-out* (utensils, chopsticks and boxes)		26.9																	
Plastic Takeout (Bento boxes and plastic utensils)		2.9																	
Straws			14 straws																
Paper																			
Recyclable Paper**		34.9		11.2															
Non-Recyclable Paper (glossy, contaminated)																			
Cardboard		0.6																	
Paper towels																			
Plastic																			
Plastics (#1-2)		0.6																	
Plastic containers (non HI-5; #3-7)																			
Food wrappers		3.3																	
Styrofoam		0.5																	
Other Plastic***		8.1																	
Glass																			
HI-5 Glass		0																	
Bottles & Containers (non HI-5)																			
Metals																			
Aluminum and Steel (soda cans & soup cans & tinfoil)		0.4																	
Non-recyclable																			
Organics																			
Food waste & Napkins																			
Green Waste		0																	
Misc.																			
Construction and Demolition		0																	
Hazardous Waste (HHW)		0																	
Office/school supplies			1 expo marker																
Mixed Residue/Misc.		5.4																	

\*Food waste was combined with compostable take-out (boxes, plates, napkins, utensils) since it was thought they could be composted together. Compostable utensils were also included but they have been found to not be compostable in a backyard compost pile. Plastic compostable to-go cups were not included in this category.

\*\*A bag of shredded paper from OSC was accidentally mixed in to the weight for LRC. This bag may have been about 4 lbs but numbers were still recorded as LRC weight. This may make the weight slightly off.

\*\*\* Other plastics included non-HI 5 bottles, plastic packaging, bottle caps and any other plastic container not #1-2.
